Business Summary

Palantir Technologies Inc. builds and deploys software platforms for the intelligence community to assist in counterterrorism investigations and operations in the United States, the United Kingdom, and internationally. It provides Palantir Gotham integrates with other platforms for defense offerings which enables users to see, understand, and act in the modern battlespace; operations centers to the tactical edge; integrating data from domains and sensors in near real-time; and situational awareness and accelerating operational decision-making, as well as facilitates the hand-off between analysts and operational users, helping operators plan and execute real-world responses to threats that have been identified within the platform. It also offers Palantir Foundry, a platform that helps organizations operate by creating a central operating system for their data; and allows individual users to integrate and analyze the data they need in one place. In addition, it provides Palantir Apollo, a software that delivers software and updates across the business, as well as enables customers to deploy their software virtually in any environment; and Palantir Artificial Intelligence Platform that provides unified access to open-source, self-hosted, and commercial large language models (LLMs) that can transform structured and unstructured data into LLM-understandable objects and can turn organizations' actions and processes into tools for humans and LLM-driven agents. The company also has a strategic partnership with Ondas Inc. to develop and deploy AI-enabled operational capabilities to scale stratospheric, aerial, and land-based ISR missions. The company has a strategic collaboration with NVIDIA to deliver an intelligent engine for running NVIDIA AI and Nemotron open models in sovereign environments and with PwC to transform critical business operations and deliver measurable enterprise value. The company was incorporated in 2003 and is headquartered in Aventura, Florida.

Stock rating

The Average Score combines six components (Earnings, Fundamental, Relative Valuation, Risk, Price Momentum, Insider Trading) on a 1–10 scale, 10 being most favourable. Scores of 8–10 are positive, 4–7 neutral and 1–3 negative. Each component is a decile rank (equal-sized buckets) of the company within its sector cohort across the S&P 500 universe; the Average Score is the simple mean of the available components.

Component weights

Component	Weighting
Fundamental pillars	25% each (renormalised if a pillar is missing; dividend pillar dropped for non-payers)
Relative Valuation	Price/Sales, trailing P/E, forward P/E: 33.3% each
Risk	Magnitude of returns, volatility, beta, correlation: 25% each
Price Momentum	Relative strength 50%, seasonality 50% (seasonality pending in this build)
Earnings	Surprises, estimate revisions, recommendation changes: equal weight
Insider Trading	Short-term 70%, long-term 30%

Fundamental ratios

Profitability	
Revenue Growth	(Net Sales - Previous Net Sales) / Previous Net Sales
Gross Margin	Gross Profit / Net Sales
Return On Equity	Net Income / Total Equity
Net Margin	Net Profit / Net Sales

Debt
